Dear Resident

**Bulga Bridge rehabilitation works**

Roads and Maritime Services (RMS) is conducting major rehabilitation works to Bulga Bridge on Putty Road, Bulga to reduce future maintenance costs. The works involve:

- Replacing the timber deck
- Replacing a number of timber elements underneath the deck
- Replacing both abutments
- Sealing the deck and line marking

Following community consultation, the preferred delivery method has been decided. This will involve closing the bridge for **14 days beginning Friday 22 February 2013** weather permitting.

A detour will be available during the work via Milbrodale Road to Broke and then via Paynes Crossing Road to rejoin the Putty Road. The detour is expected to add about 26 minutes to a normal eastbound journey from Bulga. Charlton Road will be available for local traffic only. Please refer to the diagram on the next page for more information on the detour route.

After the closure, there will be further night work (from 6pm to 4am Sunday to Thursday) to complete the new timber deck. During this work there may be delays of up to 20 minutes. RMS will endeavour to ensure motorist cross the bridge as quickly as possible during this time. This work is expected to take up to 8 weeks to complete.

There will be numerous VMS signs, advertisements and further letter box drops to keep you informed on the progress of the works and any subsequent changes. Further information can also be found on out website at:

Please contact me on (02) 4924 0608 or email John.Wells@rms.nsw.gov.au if you require any further information.

Yours faithfully,

John Wells
Project Engineer
